

DOMINIC MCFEE

IT INFRASTRUCTURE & OPERATIONS LEADER

Norton Shores, MI 49444 | (231) 288-0157 | dominic.mcfree@gmail.com

Portfolio: d-mcfree.github.io/dominic-mcfree-portfolio

PROFESSIONAL SUMMARY

Hands-on IT leader with 15+ years of progressive technology experience and more than a decade leading multi-site IT operations in a 24x7 environment. Manage infrastructure, support services, Microsoft systems, business-critical applications, and technology initiatives across three locations supporting 250+ users. Experienced in Microsoft 365, Entra ID, Active Directory, Exchange Online, Windows Server, VMware, networking, backup and recovery, ERP/SQL systems, PowerShell, endpoint provisioning, and service desk operations. Proven record of resolving complex technical issues, modernizing infrastructure, reducing costs, improving reliability, and translating operational needs into practical technology solutions.

CORE QUALIFICATIONS

- | | |
|--|---|
| • IT Operations Leadership | • Microsoft 365 / Entra ID / Active Directory |
| • Multi-Site Infrastructure | • Windows Server / VMware ESXi |
| • Service Desk & Escalation Management | • Network / Security / Backup & Recovery |
| • Vendor & Project Management | • PowerShell / SQL / Process Automation |

PROFESSIONAL EXPERIENCE

ACEMCO Incorporated | IT Manager

February 2014 - Present

- Lead day-to-day IT operations and infrastructure across three locations supporting 250+ users in a 24x7 manufacturing environment, maintaining availability of business-critical systems, networks, applications, endpoints, and production technology.
- Serve as the hands-on escalation point for complex infrastructure, network, server, application, and end-user issues, coordinating response and driving business-impacting incidents through resolution.
- Administer Microsoft 365 and identity services, including user provisioning and deprovisioning, licensing, Exchange Online, Entra ID, Active Directory, groups, permissions, MFA, and access controls.
- Lead and train IT support staff, oversee ticket prioritization and escalations, coordinate onboarding/offboarding, assign technical work, and establish expectations for issue resolution and customer support.
- Led modernization from Windows Server 2003 to VMware-hosted Windows Server 2019, reducing reliance on physical hardware and lowering infrastructure costs by approximately 30%.
- Manage VMware ESXi and Windows Server infrastructure along with Veeam backup and recovery processes for business-critical systems and data.
- Lead network and infrastructure troubleshooting across wired, wireless, firewall, telecommunications, and production environments, including connectivity for CNC equipment, lasers, printers, security systems, and other operational technology.

PROFESSIONAL EXPERIENCE - CONTINUED

ACEMCO Incorporated | IT Manager - Continued

February 2014 - Present

- Coordinate technology vendors and service providers, manage escalations and technical access, and hold external partners accountable for timelines, deliverables, and issue resolution.
- Manage Powershop ERP and Sybase/SQL reporting and troubleshooting, delivering operational and management information to Accounting, Finance, Human Resources, and other business functions.
- Use PowerShell, SQL, Power Query, scheduled tasks, and related tools for system administration, reporting, troubleshooting, and process automation.
- Lead technology deployments and lifecycle initiatives including Microsoft 365, IP telephony, security cameras, wireless infrastructure, printers, endpoints, and other business systems.

Terryberry | IT Support

2012 - February 2014

- Supported technology operations for approximately 100-150 employees, including end-user systems, server operations, user administration, backup procedures, and technical troubleshooting.
- Administered Active Directory accounts and supported Windows server maintenance in a high-availability environment.
- Created SQL queries and managed data used for sales reporting, lead generation, and targeted business initiatives.

Muskegon Community College | Helpdesk Assistant

2010 - 2012

- Provided frontline technical support for faculty and staff, troubleshooting hardware, software, and network issues.
- Managed support requests through ticketing processes while developing strong customer service, troubleshooting, and issue-resolution skills.

EDUCATION

Baker College

MBA, Information Systems

Bachelor's Degree, Business Administration

TECHNICAL EXPERTISE

Microsoft & Identity: Microsoft 365 / Office 365, Entra ID / Azure AD, Active Directory, Exchange Online, MFA, Windows Server, PowerShell

Infrastructure & Virtualization: VMware ESXi, Windows Server, endpoint provisioning, infrastructure troubleshooting

Networking & Security: Meraki Firewall, Barracuda Email Security, Ubiquiti wireless, network troubleshooting, identity and access management

Service Management: Jira, Confluence, ticket triage, escalation management, technical documentation, end-user support

Backup & Recovery: Veeam, Symantec Backup Exec

Data / ERP / Automation: SQL, SQL Management Studio, Sybase, Powershop ERP, Power Query, EDI/ASN, scheduled automation

Other Technologies: Mitel IP Phone System, VNC, security camera systems, printers, manufacturing/production technology
